

COMMUNITY PSYCHIATRY

BETTER MENTAL HEALTH. CLOSER THAN YOU THINK.

Community Psychiatry improves access to exceptional mental health care in the communities that we serve throughout California. We specialize in connected care through in person or telemedicine visits with a psychiatrist or psychiatric nurse practitioner.

Our focus is medication management, while working closely with primary care physicians and therapists to ensure that patients receive well-coordinated care.

We welcome our patients with respect and engage with referring providers, insurers, and partners in a spirit of positivity, collaboration and accountability.

Together, we create a community where our patients can achieve total health and we can work better, by working together.
