Virtual Round Table Discussion Series

July Minority Mental Health Awareness Month

Thursday, July 29, 2021

12:00 - 1:00 pm

Topic: We Must Speak to Patients and Their Families About Racism

As psychiatrists, it is our responsibility to have conversations with patients about race and racism, no matter how difficult.

As the nation addresses longstanding and entrenched inequalities, we as psychiatrists need to talk about racism in our clinical work. Whether individual, internalized, or structural, racial discrimination has an adverse effect on mental health. As psychiatrists, we should be comfortable exploring its impact with patients and their families.

Discussion Prompt Pre-Read:

In preparation for this discussion topic, please read the article co-authored by Dr. Janet Baek, Dr. Latoya Frolov and Dr. Balkozar Adam
